CONTAINERIZING THE APPLICATION:

The image shows the Docker Desktop application window. The top bar includes the 'Docker Desktop' logo, an 'Update to latest' button, and a user profile section with the name 'zubair041201'. The left sidebar contains navigation options: 'Containers' (selected), 'Images', 'Volumes', 'Dev Environments' (marked BETA), 'Extensions' (marked BETA), and 'Add Extensions'. The main area is titled 'Containers' and includes a 'Give Feedback' link. Below the title, a descriptive sentence states: 'A container packages up code and its dependencies so the application runs quickly and reliably from one computing environment to another. [Learn more](#)'. It then says 'Showing 1 items' and provides a search bar. A table lists the container details:

	NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>	 strange_banzai a65b9ad3b5d2 	docker/getting-started:latest	Running	80	30 seconds ago	  

The bottom status bar shows system metrics: 'RAM 1.40GB', 'CPU 0.25%', and 'Connected to Hub'. The Windows taskbar at the very bottom displays various application icons, including the Start menu, Search, Task View, File Explorer, Chrome, Edge, Calendar, Teams, WhatsApp, Spotify, Photos, Word, PDF Reader, Docker Desktop, and a network icon. The system clock indicates '11:56 AM 11/18/2022'.
