

Upload Image To IBM Container

Date	05 November 2022
Team ID	PNT2022TMID24032
Project Name	Smart Fashion Recommender Application

CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface in a web browser. The browser's address bar displays `cloud.ibm.com/registry/repos`. The page has a dark theme. On the left, a sidebar contains navigation links: 'Container Registry', 'Quick start', 'Namespaces' (0), 'Repositories' (0), 'Images' (0), 'Trash' (0), and 'Settings'. The main content area is titled 'Repositories'. At the top of this area is a 'Location' dropdown menu set to 'Global'. Below this is a search bar with the placeholder text 'Search'. To the right of the search bar are icons for refresh, settings, and a blue 'Create' button with a plus sign. A table header is visible with columns: 'Name', 'Image count', 'Namespace', and 'Last updated'. The table body is currently empty. Below the table, there is a large graphic with the IBM logo and the text 'Repositories' followed by the instruction: 'Your repositories will live here after you install the command line and push your first image.' The bottom of the image shows a Windows taskbar with various application icons and a system tray on the right indicating the time as 12:23 PM on 11/18/2022.
